Applicant's Response

1. In Applicant's Response dated 04/01/2009, Applicant amends the claims and provides corresponding arguments that are persuasive.

All objections and rejections previously set forth are withdrawn.

Allowable Subject Matter

2. Claims 1-21 are allowed.
3. The following is an examiner's statement of reasons for allowance

Claims 1, 17, 18 and 21

The closest prior art of Miller teaches a portal that receive preference information from a user to tailor an interface, the preference information is sent via a barcode into the computer. However, Miller does not teach that the information from the barcode is emitted from a terminal through a read area on the display and then setting the interface layout, as recited in the claims. The prior art of Iggulden does not remedy the situation, as the terminal transmits information but does not read information, meaning it is one way from the display to terminal, rather than terminal to display. Therefore, the claims are allowed over the prior art, as amended.

Claims 2-16, 19-20

These claims are dependent upon Claims 1, 17, 18 and 21, and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Allowance."
